Rapid Immunization Skill Enhancement (RISE) is a complementary capacity building package to strengthen the ongoing training of frontline health workers engaged in routine immunization under Universal Immunization Program of Government of India. This user-centric model optimally leverages the high technology (mobile phone, internet) penetration among the health workforce and effectively uses a digital training content supported by a face-to-face component of mentoring by supervisors. The digital part is primarily self-learning through an objective focused content based on adult learning principles that engages the learners through a variety of audio, animated visuals, reading and interactions like learning games and quizzes. It also has a provision of objectively assessing the learning and certification to make it more attractive to the learners. An open source Learning Management System (LMS) has been custom made to manage and deliver this digital content and provide a real-time monitoring dashboard which enables problem-solving and mentoring by supervisors. The dashboard is the basis of this weekly bulletin on RISE update.

This Week's Highlights

"We bring learning to people instead of people to learning"

M. Shanesh Begam
ANM (Deputed as VHN II)
Block: Parandur (deputed to Maduramangalam)
PHC: Vallam, Health Subcentre: Pondur
District: Kancheepuram, Tamil Nadu

She is one of the youngest health workers who is currently engaged in COVID-19 supervision and prevention activities in the entire block as per schedule. She had received immunization training for three days in January 2020.

Every day, she faces a difficult routine to raise her infant in absence of support system at home and also to reach her duty villages mostly by walk in absence of public transport due to lockdown.

Despite all these challenges and intermittent internet in her home, she showed profound interest in the RISE application as she sees it as '*good opportunity in complementing the missed training sessions during maternity*'. She even found it '*better than the routine trainings because the app has interesting games and overall gives liberty to pause and play and complete the course at own convenience*'.

Yes, Ms. Shanesh has completed both Mod 1 & Mod 2 successfully. We salute her spirits !!!!!

Congratulations

Blocks achieved 100% completion of Mod 2 this week

Block Chirgaon, District Shimla, Himachal Pradesh

Block Berasia & Zone 8, Bhopal, Madhya Pradesh

Block Bolagarh, District Khordha, Odisha

We appreciate the leadership!

Quick updates:

- * **Module 3 rolled out successfully in all states on 1st May**
- * **Within the first 24 hours, >20 % users started the module and about 10% have already completed it.**

... the race is on...
